

# **TECHLINIC**

## **Company Profile**

# **Software Development & Testing Services**

## About us

Techlinic is a leading IT outsourcing company based in East Jerusalem. The company presents pioneering software development and consultation services to businesses across various industries especially in the governmental, educational and banking sectors.

## Our core services

**Software Development:** We offer full-cycle software development services, including custom software solutions, web and mobile application development, and software product engineering

**Manual and Automation Testing:** We offer manual and automation testing to help our clients ensure their software products are robust and reliable. Our qualified team conducts testing for various types of software, including web applications, mobile apps, and desktop software.

## Specialized Boot Camps

**Technical Boot camps & soft skills trainings:** To ensure high quality resources, we conduct a range of practical training courses that are led by experts with extensive industry experience. Our courses focus on practical application, real-world skills and hands-on exercises, case studies, and projects to reinforce students' understanding of real market needs and prepare them to meet needs and requirements. .

# Technology Stack
